EXPERIENCE

Full Stack Developer

Mabzone Technologies pvt ltd

Chandigarh Onsite
March 2026 – present

- Developed reusable UI components and integrated REST APIs for a confidential client application.
- Supported frontend development, testing, and bug verification in a collaborative team environment.
- Followed clean coding practices to develop maintainable and reusable code.

Placement coordinator

DAV University, Jalandhar

Dec 2025–May 2026

- Coordinated with recruiters and companies to manage campus placement drives, interviews, and hiring processes
- Acted as the communication bridge between students and organizations, handling scheduling, data, and documentation

Web Developer Intern

Sensation Software Solution

Chandigarh, onsite
June 2025–August 2025

- Completed 2 months internship focused on frontend and backend development, contributing to real-world projects using modern web technologies.
- Developed a full-stack Vedic website using the MERN stack (MongoDB, Express, React, Node.js) focusing on cultural learning and e-commerce integration..

PROJECTS

VedPath | MongoDB, Express.js, React.js, Node.js, JWT, Bootstrap, Axios, CSS, Bcrypt, AOS, Netlify, Render, Razorpay

Github: <https://github.com/taniasha/VedPath>

June 2025 – August 2025

- Developed a MERN stack application to sell holy books like Ramayan and ancient Indian texts.
- Integrated Razorpay (test mode) for smooth and secure online payments.
- Implemented filters & search to help users browse books by category, scripture and relevance.
- Added role-based authorization with JWT to protect admin-only routes and sensitive operations.
- Deployed the MERN stack application on Netlify, enabling live access and smooth testing of all features

RentEase | React.js, Node.js, Express.js, MongoDB, JWT, Bootstrap, CSS, GitHub,

Github: <https://github.com/taniasha/RentEase>

Nov 2025 – Dec 2025

- Designed and developed a web-based rental management platform to list properties, manage tenants, and track rent transactions.
- Implemented user and landlord dashboards with property posting, booking, and payment status features.
- Built responsive UI and integrated backend logic for secure data handling and role-based access.

Freelance Web Project – I SKY Travel Agency

Jan 2026 – Feb 2026

- Implemented a client-driven web solution for ISky, translating requirements into scalable frontend components.
- Led end-to-end project execution, from requirement analysis to production deployment.
